Training

**VISIT US ON THE WEB: [www.muaclasses.com](http://www.muaclasses.com)**

Manipulation under Anesthesia (MUA) is one the most exciting chiropractic physical medicine procedures being performed today for the treatment of chronic and recurrent back pain, fibroblastic proliferative changes, chronic muscle spasm, failed back syndromes, herniated discs, unresolved headaches of non-organic origin, and is within nationally published practice guidelines and parameters of care. **MUA expands the primary role of MD/Chiropractic Physician in chronic pain management (PM) and physical medicine.**

**The 32-hour course includes didactic, specialized technique training, and clinical proctorship all leading to certification in MUA which will comply with credentialing requirements at ORANGEWOOD SURGERY CENTER allowing you to offer another valuable resource toward the quest of pain alleviation. Presented by SOUTHERN CALIFORNIA UNIVERSITY OF HEALTH SCIENCES, Gary C. Tanner, B.S., D.C., Lead Instructor. Tuition: \$1,200.00.**

**WHY MUA?**

- **Effective pain relief for chronic patients**
- **Increase medical referrals**
- **Join pain management groups**
- **Obtain outpatient surgery center privileges**
- **Secure hospital privileges**
