

Dear SCU Students,

We have completed the first week of our Limited Campus Opening. I would like to personally thank those of you who cooperated with all of the new precautions implemented to keep you safe and healthy. I hope you have enjoyed returning to campus, seeing your classmates at a safe social distance, and attending your clinical and lab courses.

As we begin week 2, we must continue to work together as a community to maintain a successful limited return to campus. We are only strong when all members of our campus community take these measures seriously.

Please remember to:

- Be forthcoming about any symptoms, possible exposures, and positive tests
- Keep at least six feet distance from your lab group unless practicing hands-on skills
- Always keep at least six feet distance from those not in your lab group, both on and off campus
- Refrain from all off-campus gatherings except with people in your immediate household. Lab group members are NOT your immediate household unless you live together.
- Use every other social distancing square when spending time in the Glen
- Wash your hands frequently and maintain proper hygiene
- Wear your mask and provided PPE
- Follow all [public health orders](#) on and off campus

I want to again thank you for your resilience and patience during this difficult and challenging period.

Sincerely,

*John*
